Novelty (N)	Claims <u>5-7, 13-15</u>	YES
	Claims <u>1-4, 8-12, 16-18</u>	NO

Document 1: JP, 2002-291039, A (TDK Corp.), 04 October, 2002 (04.10.02), full text, Figs. 1-8 (Family: none)

Document 2: JP, 2003-295994, A (Casio Computer Co., Ltd.), 17 October, 2003 (17.10.03), abstract, page 8, column 13, line 15 to page 8, column 13, line 38, Fig. 5 (Family: none)

The subject matters of claims 1-4, 8-12 and 16-18 do not appear to be novel or to involve an inventive step because these matters are described in document 1 (page 6, column 9, lines 9-17) cited in the ISR. Document 1 describes a technique of receiving a profile type from each device in a wireless network, displaying devices whose profile type is indicated by a flag "1" in a selection list and not displaying devices whose profile type is indicated by a flag "0" in the selection list. Although the expression is different, no significant difference between the technique described in document 1 and the subject matters of claims 1-4, 8-12 and 16-18 of the subject application can be found.

The subject matters of claims 5-7 and 13-15 do not appear to involve an inventive step in view of documents 1 and 2 cited in the ISR. Document 2 (Fig. 5) describes a technique of changing the display form of icons on the basis of the communication status. Therefore, a person skilled in the art could have easily conceived of changing the display form on the basis of the communication status in order to display the status of the communication with network apparatus intelligibly in the technique described in document 1.
